

CHANGING/FIXING THE TIME & DATE

Set Dial to 'CURRENT TIME & DATE'

- First screen will show the year.
Press + (top rectangle) to increase and - (bottom rectangle) to decrease
- Press the right arrow button ► to switch the screen to day/month.
Press + (top rectangle) to increase and - (bottom rectangle) to decrease.
- Press the right arrow button ► to switch the screen to the time.
Press + (top rectangle) to increase and - (bottom rectangle) to decrease

CHANGING START TIME

1. Set Dial to 'START TIMES'
2. When '1 - 4am' is selected, press the + to bump the time up to 5am, 6am, 7am, etc.
3. Pressing the - will take the time back down.

NOTE: Do not add times to 2, 3, or 4. These are not your zones, they are additional slots for watering times. If you add more times, the system will run multiple times a day on your watering days. However, if that is what you are looking to do you can.

RUNNING THROUGH THE SYSTEM

1. Set Dial to 'RUN'
2. Press and hold the right arrow button ► until Zone 1 starts.
 - Press right arrow button ► again to start Zone 2
 - Press right arrow button ► again to start Zone 3
 - Press right arrow button ► again to start Zone 4
4. Press the right arrow button ► one last time to end the cycle. The controller will then default back to the saved system/watering settings.

NOTE: If you press and hold right arrow on controller for 2-3 seconds it will run the entire cycle for you. Once the system has run through the entire cycle, it will go back to the regular schedule.
